1998'DEN BERİ
Alnımızun Akıyla...

Since the day we were founded, our biggest goal in business life has never been just to make money.

We believed in business ethics, the importance of promises, the sanctity of the right of the customer and the public and that our employees should have the right to a humane life and we adopted this as a corporate culture.

Our customers, each of whom is very special, gave us the opportunity to realize their dreams in line with these principles by trusting and believing in us.

We believed that we would be successful when we worked shoulder to shoulder with determination and tenacity, knowing our responsibility not to embarrass those who trust us, and we proved this with the projects we did. We delivered each of our projects as we promised, at the time we promised.

With our **24 years of experience**, we have designed and implemented projects of production and living spaces of more than **3.000.000 m²**, mainly residences, villas, industrial buildings, business and shopping centers.

We have always believed that we will be successful when knowledge and experience work hand in hand.

In this context, we continued all our work with tenacity and determination, aiming to rapidly realize our new projects by using all the innovations and technologies required by our age.

As we have been doing **honourably since 1998**, without compromising our honesty and business ethics, we will continue to implement new projects that will add value to our customers and business partners, especially to our country, and we will continue to work and produce more and more.
